Re: Genesee Land Bank Center
Flint, MI

Attention: Dee Schoenfield

Dear Mrs. Schoenfield,

We would like to take this opportunity to commend Walker Electric for their work at the Land Bank Center. Relying on your past experience and attention to detail we successfully deliver a quality project at the Land Bank Center on schedule.

A special appreciation goes to Walker Electric in our effort to redesign the switchgear center. Working with Consumers Energy along with the Electrical Engineer, Walker Electric provided the leadership and experience necessary to find a solution to our Primary Electrical Service problem.

Walker Electric attention to quality was reason for such a minor punch list and our ability to turn the project over on schedule. On behalf of JC Beal Construction and I am certain all the project subcontractors we thank you for the team effort Walker Electric demonstrated.

Look forward to our next project working together.

Sincerely,

J. C. Beal Construction, Inc.
Jeff Laswell
